1. Introduction

1.1. Parties to the Construction Process

Please refer:

Company	Your Company	Contact Name	
Client	Your Client	Contact Name	
Owner		Contact Name	

1.2. Purpose

This Construction Management Plan, further referring to as CMP, derives from the defined delivery methodology [Name of project delivery methodology] for this project.

The purpose of this document is to define how the construction management process shall work ensuring that all construction activities are executed in accordance with (Customer) intent to provide timely and quality construction services under safety principles.

The scope of the CMP is further to ascertain a professional approach for simultaneous site activities located in [location], [state, country] with the main goals to optimise onsite construction time, remain within budget limits, meet the project schedule defining construction sequence, material off-take, roles and responsibilities.

1.3. Construction Principles

1.3.1 Sub-Sections

The project will be segregated into constructible sub-sections.

1.3.2 Modularisation

Modularisation is an off-site manufacturing method, which shall be applied where possible to reduce onsite construction time.

1.3.3 Stick Built
